# Drive progress and mastery with the power of AI-enabled reporting.

## Written by humans, powered by AI: ALC progress and gap reporting for skills in Grade 3, 6, and 9.

Diagnostic assessments identify learning gaps across the skills for national assessment indicators.

Administrator and teacher reports monitor data-driven progress and achievement.

Practice tests simulate the experience of high-stakes exams.

Admin Achievement Reports

See how your school is doing on skills mastery with just one click. Map any missing domains in your US curriculum approach with our correlation guides.

Teacher Progress and Status Tools

Monitor student progress and sort by the subject domains with the biggest gaps to drive intervention planning.

Support for Students and Parents

Make exam practice fun and easy! The ALC chatbot provides on-demand study help, and students can challenge each other to interactive games.
